

Rule your fleet from a smartphone.

The app built for fleet managers on the go. Message drivers and see your entire fleet on a map with real-time updates on vehicle ignition status, current speed, scheduled stop statuses, and more.

Vehicle list keeps you up to speed

At a glance, see every active vehicle in your fleet with essential details like current location, ignition status, speed, and driver. All the data automatically updates at customizable intervals.

See the big picture with map view

Visualize your fleet with a bird's eye view of every active vehicle on a map. Choose from dozens of icon and color combinations to make it unique to your fleet. Tap a vehicle to see basic vehicle details without ever leaving the map view.

Vehicle detail screen for deeper insight

Tap on any vehicle to view additional details such as engine status and current address. You'll also see the vehicle's current speed and driver, as well as the driver's HOS duty status and the number of scheduled stops remaining for the day.

✔ Real-Time Data

View live updates of vehicle and driver information like current location, ignition status, driver duty status, and more.

✔ Find Nearby Drivers

Quickly find drivers that are closest to a location by simply dropping a pin onto the map.

✔ Activity History

Look back at a vehicle's activity to see exactly where it was and where it was going at any moment in time.

✔ Scheduled Stops Status

Check the status of a vehicle's scheduled and remaining stops for the day.
